

NEW ESSA PUBLICATION

Technical Paper No. 56, "Interdiurnal Variability of Pressure and Temperature in the Conterminous United States," by H. E. Landsberg, 1966, 53 pp. Price 40 cents.

Maps and tabulations of the day-to-day changes in pressure and temperature at 75 stations. The study covers the period 1957-1961. A review of the history of interdiurnal temperature and pressure variation and a discussion of the meaning of the pattern of variations for each season are given.

NEW PUBLICATION OF NATIONAL BUREAU OF STANDARDS

NBS Monograph 92, "Radio Meteorology," 1966, 443 pp. Price \$2.75 (cloth)

Authoritative text on radio wave refraction and refractive index structure of the lower atmosphere.

Both publications available from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C., 20402
